

# Line Replacement Service

## Digitally transform all voice and specialty phone lines.

A complete transition of all traditional phone lines is now possible, including special services, such as fax, alarms, POS and elevator lines, which use to required an analog dial tone. These few relics cost companies unreasonably high monthly rates that continue to climb year over year. Now there's an alternative. MetTel's Line Replacement Service provides an easy, cost-effective way to complete your telecom digital transformation with plug and play simplicity.

### Key Benefits

#### DIGITALLY TRANSFORM & SAVE

MetTel's Line Replacement Service provides a reliable way to completely eliminate expensive POTS lines that supply voice, fax, alarms, elevator lines and more.

#### INSTANT PLUG & PLAY

Our bundled solution includes installation, hardware, backup battery, and software so lines can be up and running with little to no effort. Within seconds, you can be digitally transformed and realize immediate ROI.

#### ULTIMATE 3-WAY REDUNDANCY

With our backup battery, you'll always be connected with alternative internet access through broadband and 4G. This provides true fail-over with diverse and alternate routing. And, because 4G LTE is delivered on a top-tier carrier's network, you get the highest level of security and the most reliable cellular connectivity.

## Features

### SUPPORTED LINES

- Fax
- Alarm
- Elevator
- POS Terminal
- Vending Machines
- ATM Machines
- E-911
- Voice

### BEST CONNECTION & COVERAGE

The adapter connects to the internet via broadband, Wi-Fi and/or 4G LTE SIM.

When bundled with MetTel mobility, Line Replacement Service can be added to your cross-carrier pooling data allowance, which includes your connected desk phones.

**Estimated Cost Savings 30%  
Immediate & Year-to-Year**

## Additional Benefits

### ENTERPRISE-GRADE SECURITY

Cellular traffic is routed through a firewalled Network Operating Center (NOC) to enable ultra-safe call origination / completion.

### ONE STOP SHOP

MetTel provides the equipment, installation and service all with the best centralized telecom management platform. This allows for the added soft-cost savings of a consolidated invoice along with a single point of contact and an award-winning customer support team.

## Easy Installation

Connect the Line Replacement Service adapter to the internet, plug in your voice and specialty lines, and just like that, no more expensive analog lines.

### CONNECTIVITY OPTIONS

- Connect with Wi-Fi, broadband and/or 3G/4G LTE
- Cellular can be the primary connectivity if Wi-Fi or broadband are not available, or act as a backup in the event of primary circuit failure
- The adapter can serve as a Wi-Fi access point
- With connection to 3G/4G LTE cellular service, downtime is at the lowest possible level
- Dual SIMs provides added fail-over protection, perfect for 911 call completion assurance

### SUPPORTS MULTIPLE LINES

The standard adapter supports two lines; the add-on adapter supports eight more for a total of up to 10 lines.

## 4 Steps to a New Phone System

1. Plug in the box with its backup battery
2. Insert your SIM cards (for 4G)
3. Use the included software to connect to the internet via Wi-Fi and/or broadband
4. Connect your specialty or voice lines and you're all set!
